

The 'engine'-principle of a SPIRAL-GALAX by LEHEL RÉPITS ©

Magnetic field structure

Synchronizing diagram for the different parts

Elmagnet, core made of
 $\text{Al}_2\text{O}_3 \cdot 2\text{SiO}_2$ 19%
 $\text{Fe (p.a., powder Din 80)}$ 81%
 $+ \text{H}_2\text{O}$
 Burning temperature
 1620-1650°C

Elmagnetic impulse element

ATTENTION!!!
 When trying to build the engine: Take normal precautions when dealing with the electric current and its effect.

This drawing is made with the aim of the publication all over world.

The engine is **reconstructed** on the base of the original construction plan of the **GREAT PYRAMID**

The drawing is a complementary detail to compendium
